 - Visual and sound warning of "full tank"
 - Gravity Control of tank level
 - Display indicating room temperature and Humidity
- 6000 V Ionizer (*optional*)
- Very silent
- Particularly efficient (*round pipes evaporator*)
- Wide pitch between condenser fins for long life and no maintenance need
- Very long life

ADVANCED MICROPROCESSOR CONTROL

APPLICATIONS OF DOMESTIC DEHUMIDIFIERS

Every house, office and shop should have a dehumidifier for manifold reasons.

Practically every living, working and relaxing place should have the right humidity for a healthy pleasant feeling and well-being and to avoid damages to persons and things.

MAIN APPLICATIONS

- Flats and houses (*residential and holidays*)
- Laundries (*fast drying of clothes, maintaining the natural vapour aspect of wool and cotton*)
- Bathrooms
- Canteens and cellars
- Basements
- Hairdressers and aesthetic studios
- Stationary and florists shops
- Pastry and fish shops
